Siemens Healthcare Diagnostics, a global leader in clinical diagnostics, provides healthcare professionals in hospital, reference, and physician office laboratories and point-of-care settings with the vital information required to accurately diagnose, treat, and monitor patients. Our innovative portfolio of performance-driven solutions and personalized customer care combine to streamline workflow, enhance operational efficiency, and support improved patient outcomes.

The Formula for the Future. Today.

The ADVIA Centaur XPT Immunoassay System is engineered for continuous operation and timely, accurate results—helping you reach your full potential today and be prepared for tomorrow.

Answers for life.

Offer cutting-edge
technology to clinicians
and bring more productivity
into your laboratory.

Stay Ahead of Increasing Workload Demands

Professionals like you work tirelessly to help clinicians deliver better patient care

The need for easy-to-use solutions that enhance workflow and meet the ever-increasing demands for reliable, rapid diagnostic results has never been more critical. The ADVIA Centaur® XPT Immunoassay System meets this need.

Designed with one of the most advanced software packages on the market, the ADVIA Centaur XPT System is among the highest-throughput systems available. The ADVIA Centaur XPT System delivers the results that clinicians depend on for accurate diagnoses and better patient care, predictably and consistently.

Siemens unites innovative workflow solutions with clinical excellence in the ADVIA Centaur XPT System, leading to greater laboratory productivity to stay ahead of increasing workload demands.

Under FDA review. Not available for sale in the U.S.

Engineered for Continuous Operation

Uninterrupted processing and enhanced laboratory efficiency through simplified, continuous operation

- Simplified training and operation through an intuitive, icon-driven user interface
- No interruption of processing through on-the-fly loading and unloading of samples, reagents, and supplies
- Time savings through 2-D bar-code scanning of test definitions
- Improved workflow through automated daily maintenance and no monthly cleaning procedure
- No daily startup procedure

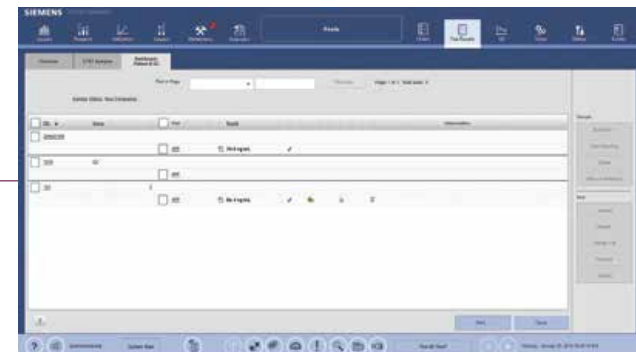

Advanced user interface simplifies training and operation.

Assay Utilization

Engineered for Accurate, Timely Results

Screening, diagnosis, and monitoring of the most complex diseases through cutting-edge immunoassay testing technology

- Comprehensive menu supports over 70 tests, including infectious disease
- Continual introduction of new and innovative assays through versatile, advanced acridinium ester (AE) technology with over 40 active patents
- Fast turnaround of up to 240 tests per hour, even during peak workload times
- Priority sampling at any time via STAT port, even when connected to automation
- Highly stable, ready-to-use reagents used on all ADVIA Centaur® systems
- No sample-to-sample carryover through disposable sample tips
- Operator intervention nearly eliminated through automated clot management
- Automated repeat and confirmatory testing of reactive samples through SMART algorithm software. Powerful automation and software that streamlines and accelerates your workflow

Ready-to-use and easy-to-load reagents

STAT port for immediate processing

Engineered for Seamless Connectivity

Automation-ready

Simple, cost-effective integration with Siemens automation, with direct-from-track sampling and no need for an additional robotic interface

Aptio™ Automation, ADVIA® Automation, and StreamLAB® Automation Solutions

Improved resource utilization, reduced errors, and consistent, predictable turnaround time through flexible, modular design; point-in-space sampling; single-sample flow; and intelligent technologies

Aptio Automation track

VersaCell® and VersaCell X3 Solutions

A balanced mix of immunoassay and/or chemistry analytics through advanced robotics and three-instrument connectivity

CentraLink™ Data Management System

Efficient delivery of timely, accurate results through customized, streamlined workflows across automation, IT, immunoassay systems, and other disciplines

Siemens Remote Service (SRS) for Diagnostics

Secure network delivering real-time remote service technology that connects your instruments with continuous access to global technical support from Siemens

VersaCell Connectivity
